

EMBRY

MODEL EM200

The Embry makes an elegant statement with its sturdy 2" diameter head transitioning through a sculpted neck and the leg's gentle taper. The distinct contrast in diameter defines this sophisticated silhouette. The Embry leg incorporates a unique leveling pin in the bottom of the foot, allowing for 3/4" of height adjustment, correcting any out-of-level floor condition.

The Embry is sold as Single Legs only, use more than one to create your configuration.

Palmer Consoles are completely modular and custom built to any design and leg configuration
