PALMER POT RACK PERFECTION

Showcase your fine cookware with Palmer's designer pot racks, featuring our proprietary modular components, available in both our Classic and Modern styles, and sized to fit your unique needs.

Our pot racks feature solid brass, CNC machined fittings for exceptionally crisp details, offering a perfect fit and finish not possible with lower quality, imported sand castings.

These pot racks will perfectly complement our line of bistro shelving, kitchen island legs, and gallery rails, and are available in any size, configuration, and finish.
