

## For use with Rail Style ( SS#R ) & Low Profile ( SS#LP ) Shelf Supports

Shelf Support Ring and Pin

If your leg system has a “nested” shelf it will be shipped with the Shelf Support Rings installed.

These rings may require minor adjustment to properly position the shelf, align the pins with the shelf notches, and to keep the shelf from rocking.

### **If adjustment is required:**

Using the provided 3/32” Hex Key, loosen the set screw and the threaded Shelf Ring Pin enough to allow you to re-position the Shelf Ring Pin to make contact with the shelf. Re-tighten both screws & replace rubber cover.
