

WESTPORT

MODEL LS2W

The Westport is similar in concept to our Capital style, reminiscent of an architectural column, but with a round (not square) head, and a single horizontal crossbar. All components such as the foot, top cap, decorative ring, and corner socket coordinate perfectly. The clear distinction in diameter between the larger 1 ½" diameter head and the smaller 1" diameter lower leg define this elegant silhouette.

Palmer Consoles are completely modular and custom built to any design and leg configuration
