

Palmer Consoles are completely modular and custom built to any design and leg configuration

TEAK SHELF

Accessory

Introduce a spa-like atmosphere to your bathroom with the Palmer solid Teak shelf. Each shelf is custom made to your specific dimensions, and compliments the metalwork of the console with a warm texture, and coordinating material.

Our Teak is 100% heartwood (the center of the tree), providing the deepest and richest brown and gold colors, along with a high-percentage of natural oil. Teak is a strong, dense, superbly stable wood, perfect for wet and humid environments due to its outstanding resistance to decay...all of these properties ranking Teak one of the most desired woods in the world.

Handcrafted in the USA, employing stainless-steel fasteners, waterproof glue, a unique mitered sub-frame, and hidden structural supports, this shelf will stand the test of time, and provide much-needed additional storage for your space.
