

EMBRY MODEL LS2EM

The Embry makes an elegant statement with its sturdy 2" diameter head transitioning through a sculpted neck and the leg's gentle taper. The distinct contrast in diameter defines this sophisticated silhouette. The Embry leg incorporates a unique leveling pin in the bottom of the foot, allowing for 3/4" of height adjustment, correcting any out-of-level floor condition.

Palmer Consoles are completely modular and custom built to any design and leg configuration
