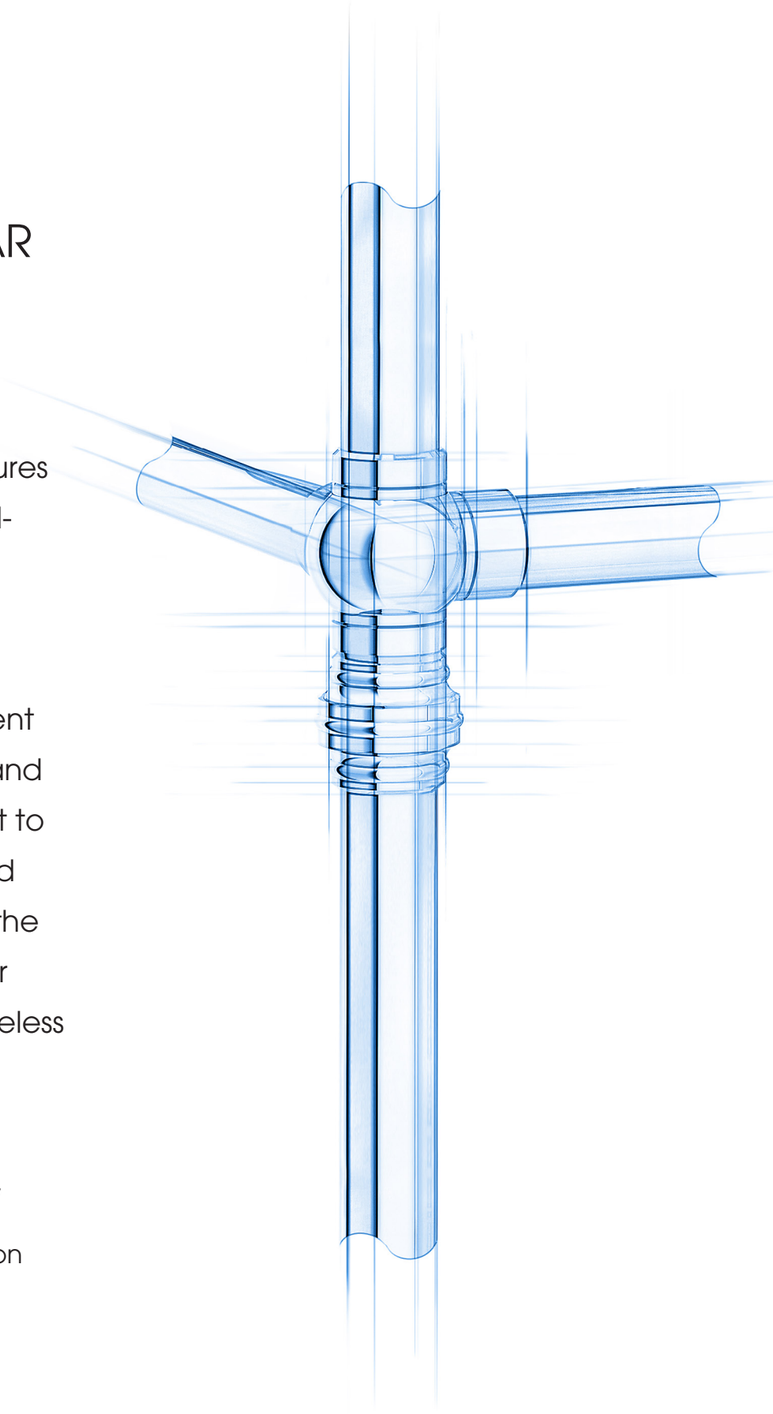
PALMER INDUSTRIES
CUSTOM SINK LEG SOLUTIONS

Decorative Collar

MODEL LS2C



The Decorative Collar style features our distinctive and updated ball-and-socket fitting, with its sharp lines and strong visual presence reminiscent of early European plumbing fixtures. This component provides strength and stability, and imparts a classic design element to this model. The crisply machined decorative collars repeated at the floor and underneath the corner joint afford a traditional and timeless feel for today's finer bathrooms.

Palmer Consoles are completely modular and custom built to any design and leg configuration
