

STEMWARE HOLDERS

Palmer Industries now offers our cleanly designed Stemware Holders to make the “under sides” of your shelves as useful as the top side.

- Unique design aesthetic unlike the typical commercial designs. Will fit up to a 3 1/2” diameter stemware base
- Adjustable depth: can be supplied by Palmer in almost any depth dimension to fit your shelving
- Can be mounted on wood shelving materials or palmer brass horizontal tubing. Cannot be directly mounted to glass.

BOTTLE RAILS

Palmer offers Bottle Rails to keep bottles and other items securely in place on open shelving.

- These elegant components can be custom configured to any side of the shelving unit, providing protection without obstructing visibility.
- Designed to integrate seamlessly into our systems, they are available in matching finishes for a cohesive, refined presentation.

GALLERY RAILS

Palmer offers custom, Free Standing Gallery Rail systems, crafted to elevate both form and function. Each rail features solid brass, CNC-machined posts for exceptionally crisp detailing and a refined fit and finish. Designed with versatility in mind, our Gallery Rails can be seamlessly integrated with Palmer shelving units—adding both a decorative and practical barrier to keep items securely in place.

- Two Post Styles
- Two Post Height
- End Posts, Middle Posts, Corner Post Configurations
- 5/16” diameter solid rod
